EXTRACT OF THE 2024 FINAL DECLARATION

In pursuit of a Europe built on progress and social advancement, we advocate for an equitable distribution of wealth, strong universal and quality public services, and public ownership of shared resources to create a fairer, more participatory, and democratically planned society. Access to decent, affordable, and climate-appropriate housing must be a right, not a luxury. Social security, including healthcare, pensions, and unemployment benefits, should be universal right guaranteed to all people across the EU. This implies a different use of money from companies, banks and the ECB."

"We advocate for a Europe founded on peace and solidarity, promoting a future shaped by peaceful and diplomatic solutions, that deals with conflicts through dialogue. A Europe that integrates an alternative approach to security, based on a new vision that no State can truly be safe unless the others share the same level of security.
